DETAILED ACTION

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 33-62 been renumbered 32-61, respectively. *Election/Restrictions*

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 32-50, 52-58, drawn to a shear analyzer and method which contains a device for producing extremely thin liquid layers.

Group II, claim(s) 51, drawn to a method of determining thickness of an ultra-thin liquid layer.

Group III, claims(s) 59-61, drawn to a method of determining an absorption rate constant.

The inventions are distinct, each from the other because of the following reasons:

The inventions as listed as Group I to Group III do not relate to a single general inventive concept under PCT Rule 13.1, because under PCT Rule 13.1, they lack the same or corresponding special technical features for the following reasons: the claims of Group I do not require the special technical features of a liquid flow comprising a strongly fluorescing fluorophor which does not absorb to the measurement surface and generating an evanescent light wave of Group II or the special technical feature comprising an emission monochromator with

optical prism of Group III. Similarly, the technical features of the claims of Group II-III do not relate to a single inventive concept. None of the claims as presently written link together the inventions set forth in Groups I-III.

3. A telephone call was made to Sandra Thompson on May 13, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to P. Kathryn Bex whose telephone number is (703) 306-5697. The examiner can normally be reached on Mondays-Thursdays, alternate Fridays from 6:00 am to 3:30 pm EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 308-4037.

The fax number for the organization where this application or proceeding is assigned is (703) 872-9310 for official papers prior to mailing of a Final Office Action. For after-Final Office Actions use (703) 872-9311. For unofficial or draft papers use fax number (703) 305-
